EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

claims 26-32 are canceled.

2. This application is in condition for allowance except for the presence of claims 26-32 which are non-elected without traverse. Accordingly, claims 26-32 have been cancelled.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 18, Applicant's claimed invention is patentable over the prior art because the prior art fails to disclose a computer-implemented method for automotive financial analysis that utilizes vehicle manufacturing and sales data from operating cost data and balance sheet data to input into a financial projection engine that includes a volume extension tool, an aggregation/average tool, an allocation tool, an exchange tool, and a variance tool; and displaying one or more results from the projection engine. Lyons '141 discloses a computer system for financial analyses and reporting that includes an aggregation/average tool, and exchange tool, and a variance tool. However, Lyons '141 fails to disclose vehicle related data and tools specifically related to volume extension and allocation are required by claim 18. Edstrom discloses a scheduling method and apparatus that includes forecasting demands and

allocation but fails to disclose the specific features relating to the volume extension tool required in claim 18 as most recently amended. No single reference or combination of references anticipate or make obvious Applicant's claimed invention. In conclusion, claims 18 and 20-25 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Japanese Patent Publication 9-218897 (Derwent # 1997-539626) is cited of interest for disclosing a production planning system.

Non-patent literature from Yasmin et al. (A profile of successful US manufacturers:...) is cited of interest for disclosing an evaluation of the effectiveness of manufacturing strategies and practices.
